

MEDITE SMARTPLY PARTNER WITH SARAH EBERLE FOR RHS CHELSEA FLOWER SHOW 2022

MEDITE SMARTPLY is to partner with RHS Chelsea Flower Show's most decorated designer, Sarah Eberle, for the event in May 2022.

Following on from its involvement at the COP26 UN Climate Change Conference in Glasgow, the company has set its sights on RHS Chelsea Flower Show to showcase its innovative product range and commitment to sustainable building. Working with award-winning landscape architect and innovative garden designer Sarah Eberle, it also aims to highlight the possibilities of engineered wood panels at the home of the world's best garden design.

The garden will be themed around sustainability and the multiple applications and versatility of MEDITE SMARTPLY products. As a responsible manufacturer of wood construction panels, the company is committed to manufacturing products that contribute to healthier buildings that are carbon negative to factory gate, helping towards net zero carbon 2030 and 2050 goals.

"I am delighted to be working with MEDITE SMARTPLY and to be able to use its products in my design for the new garden," said Sarah. "I am over the moon to work with such an innovative company who manufacture exceptional wood-based panels while maintaining outstanding sustainability credentials.

"I am really enthused to have MEDITE SMARTPLY's support for next year's show. We will be revealing the full design and back story closer to the event so keep your eyes peeled."

The event, which will take place in May 2022, is the highlight of the year for all outdoor designers and is a first for MEDITE SMARTPLY.

"We're thrilled to be involved with the RHS Chelsea Flower Show 2022, and to partner with such a prestigious designer is truly an honour," commented Chris King, Managing Director - Commercial at MEDITE SMARTPLY.

"Although our products have long been used at events as renowned as the RHS Chelsea Flower Show, we wanted to use this opportunity to show the world just how far wood panel products have come in terms of innovation and sustainability.

"Not only can MEDITE SMARTPLY panel products help you to achieve the most stringent sustainability criteria, but they can do so in a way that does not limit the creativity and inspiration of the world's best designers."

To demonstrate the products' limitless design capabilities, MEDITE SMARTPLY have recently launched an online MDF community site meditemakesitreal.com/ which invites MDF enthusiasts to share work, gain inspiration and even win prizes that will enable the user to build bigger and better with MDF.
